The
Illic
Series.

Alfred is **65** and
lives in a care
home.

His daily routing is loosely
structured and there
are a number of optional
activities available.

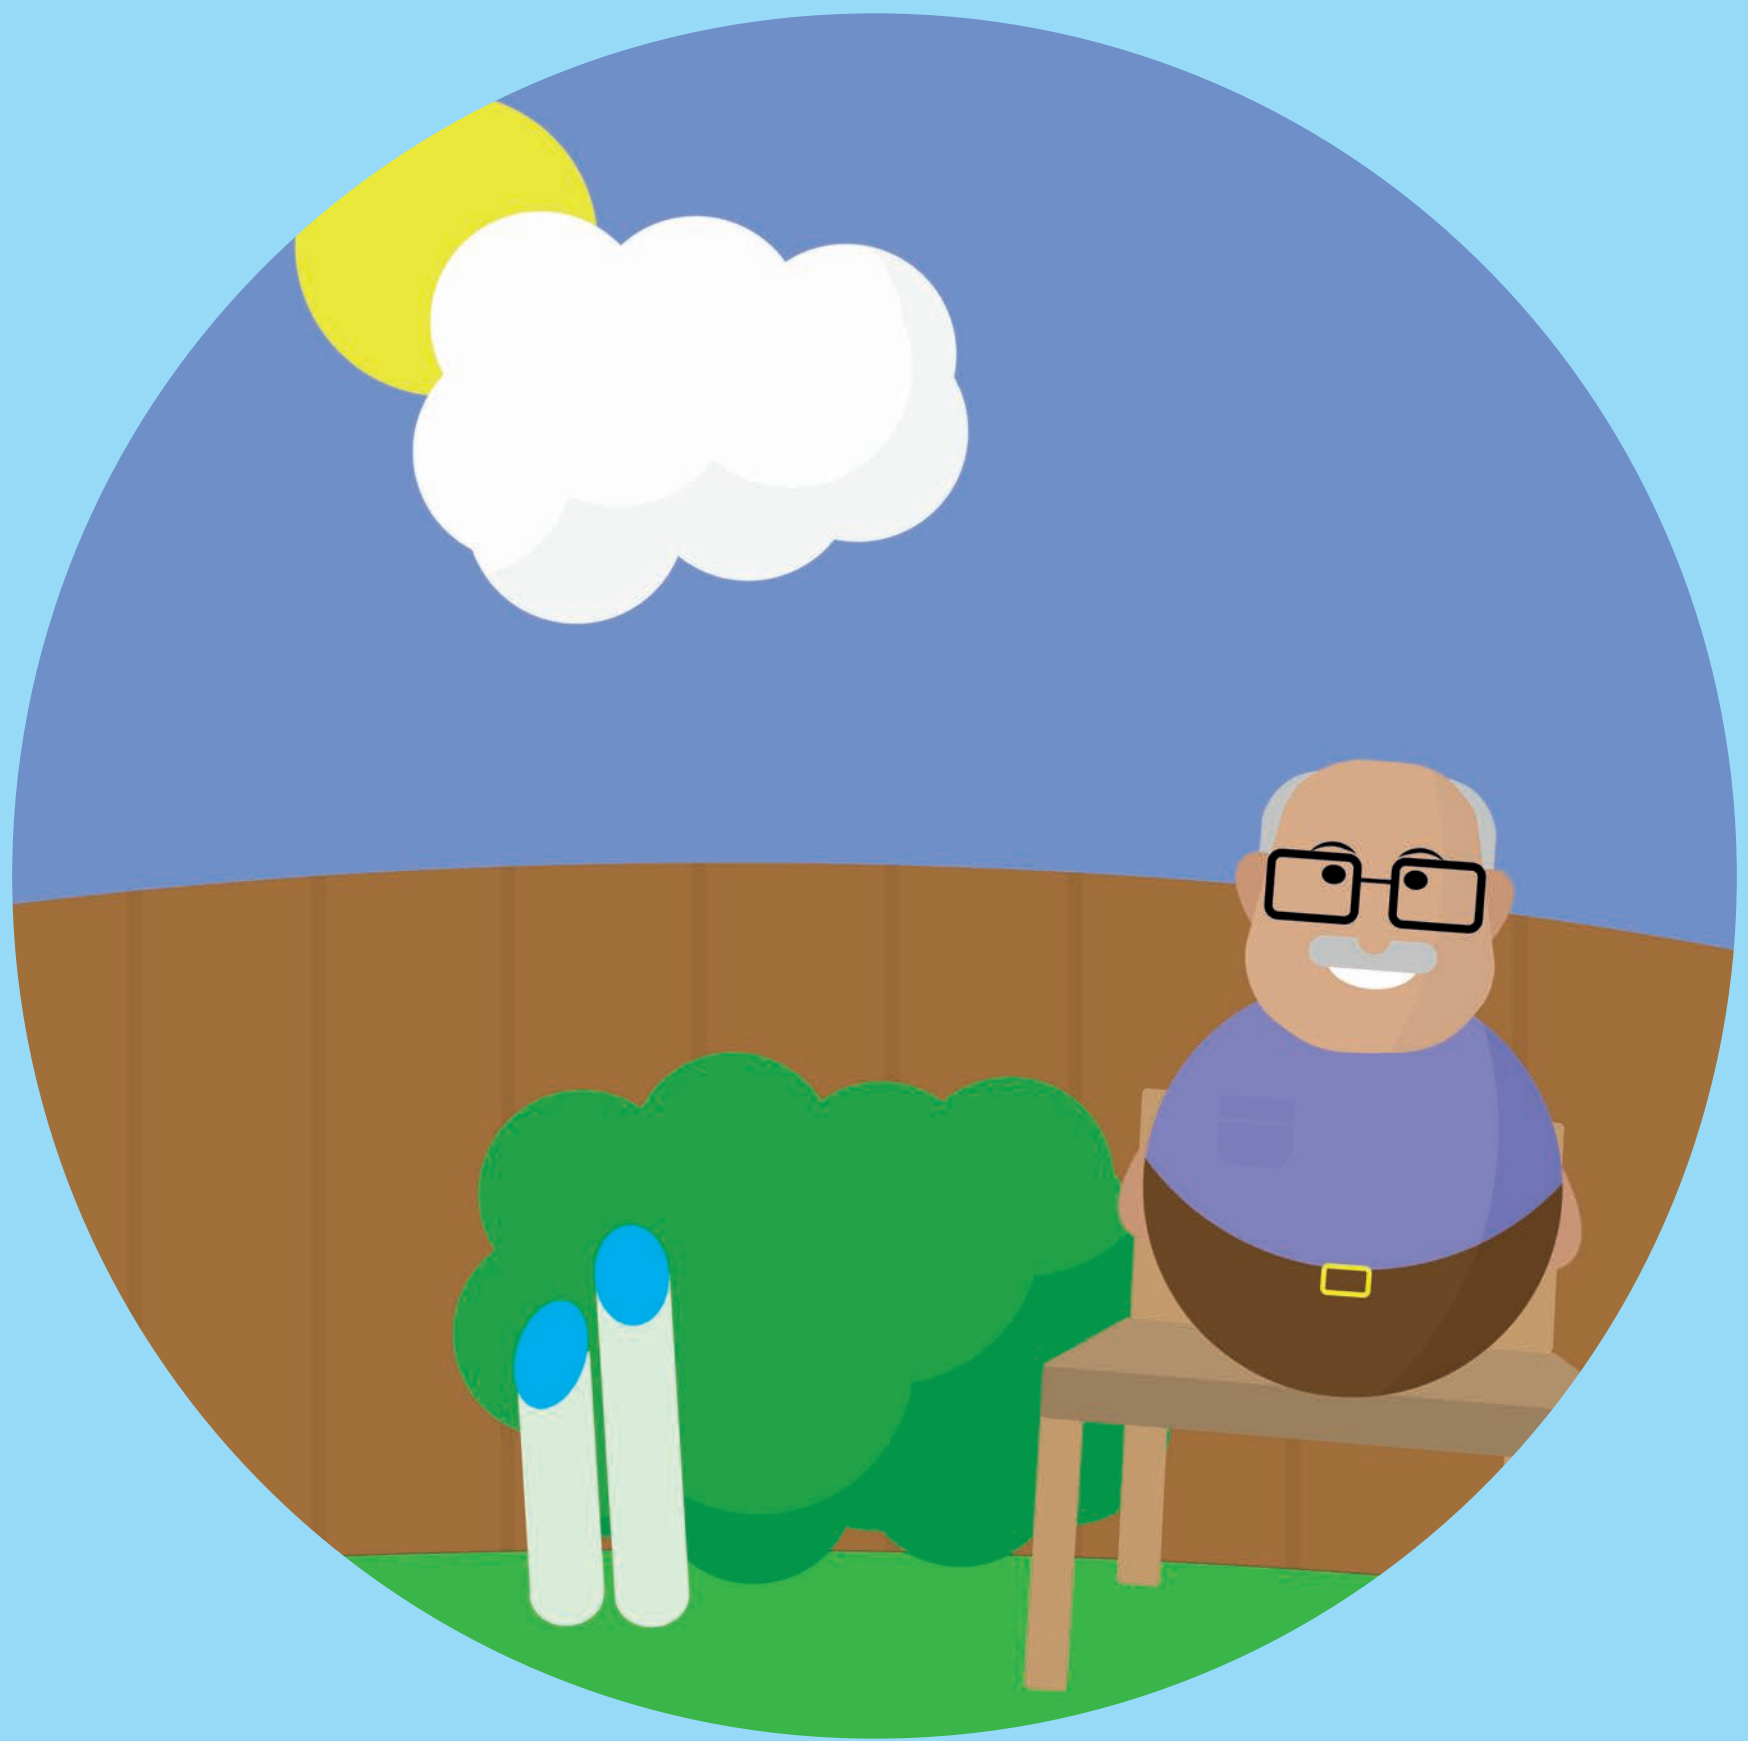

He is **widowed** and has a
son. This son has a family
and full time
job. and He visits when he
can.

He has plenty of friends in the care
home and the carers are fully
committed to his wellbeing. They
keep a close eye on his
development.
