

Morley and Outwood Parliamentary Constituency

This is the second bulletin of 2014 produced by Northern Housing Consortium (NHC) providing analysis of housing-related data for the Parliamentary Constituencies in the North of England. The report provides analysis of the impacts of welfare reform and the housing market in the constituency.

We have used the following symbols to indicate your performance against the relevant regional or national statistics.

Financial Distress

According to The Poverty Site, using data from Annual Survey of Hours and Earnings (ASHE), 18.6% of employees in Leeds are paid less than £7 per hour (below their low paid threshold) compared to 23% in Yorkshire and Humberside.

Census data shows that in the Constituency, 26.3% of 16 to 74 year olds in employment worked part-time and that of these, 28.1% worked 15 hours or less. As Figure 1 below shows Morley North (28.9%) has the highest proportions of part-time workers working 15 hours or less.

Across the North, the number of people claiming Housing Benefit whilst in employment (and not on a passported Benefit) has risen by 7% between May 2013 and May 2014. There is a similar picture in the Constituency where there has been a 12.2% increase from 944 to 1,059 during this time (DWP).

A survey carried out by Which? estimates that 41% of people in the Constituency are worried about their level of household debt and 50% are worried about the level of their savings and investments. It also shows that 6% have defaulted on a loan, bill or housing costs.

Housing Market

The National Housing Federation report “[Broken Market, Broken Dreams](#)” warns how the first rung of the property ladder is becoming further out of reach for many prospective buyers, saying that the average first time buyer now needs a £30,000 deposit to buy their first home. ONS figures show that in the third quarter of 2011 first-time buyers in the Yorkshire and Humberside needed an average deposit of £26,000.

The Shelter report “[The Clipped Wings Generation](#)” showed that the lack of affordable housing is by far the main reason that people aged 20–34 and in work give for living at home with their parents. In Leeds, some 23,833 (18%) working 20–34 year olds live at home with their parents.

The supply of new affordable housing in Leeds as a proportion of total build has risen recently. In the first two quarters of 2014, there were 40 homes were completed by registered providers out of a total of 780 (5.1%) in the period. This compares with 30 social homes out of 760 (3.9%) in the same period in 2013.

The National Audit Office has found “little evidence” that the New Homes Bonus has made a significant change to local authorities’ behaviour in terms of planning approvals and “has shifted cash from poor northern councils to rich areas in the south” (Inside Housing). Since 2011/12, the three northern regions have received 19.4% of NHB payments to English LAs, although they brought 41.5% of the net empty homes back into use under the scheme.

So far in 2014-15, Leeds Council has received £3,008,197 in NHB payments for providing 2,206 additional homes (1,822 new homes and bringing 384 empty homes back into use). This represents 35.7% of the total West Yorkshire units for award.
