

Redcar Parliamentary Constituency

This is the first bulletin of 2015 produced by Northern Housing Consortium (NHC) providing analysis of housing-related data for the Parliamentary Constituencies in the North of England. The report provides analysis of the impacts of welfare reform and the housing market in the constituency.

We have used the following symbols to indicate your performance against the relevant regional or national statistics.

Financial Distress

Census data shows that in Redcar, 66.9% of working aged people were working full-time and 33.1% worked part-time. The corresponding figures for the region are 70% and 30%.

The Annual Survey of Salaries and Hours (ASHE) shows that in the constituency (as a place of work), 26.3% of all employee jobs paid below the Living Wage in 2014 (£7.65ph), a decrease from 27.4% in 2013. This compares to 23.4% regionally and 21.7% nationally.

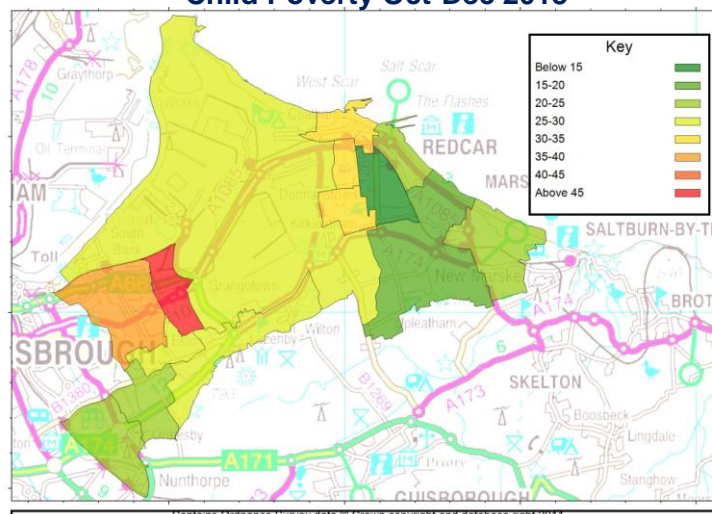

In the constituency, between September 2013 and September 2014, total Benefit sanctions fell by 32.7%. Employment and Support Allowance sanctions grew from 5 to 12 (140%) in this period. Meanwhile, Job Seekers Allowance sanctions fell from 243 to 155 (-36.2%).

In a previous edition of the Constituency Profiles, we reported that in Redcar, 30% of children live in poverty. One year on, we can report that figure, before housing costs, stands at 17.6%. However, when housing costs are taken into account, 28% of children live in poverty (End Child Poverty) and the map below shows that Grangetown (46.9%) is the worst affected ward.

Child Poverty Oct-Dec 2013

Housing Market

After a general downward trend between Q1 2013 to Q2 2014, social landlord possession claims fell further by 10.3% between Q2 2014 and Q4 2014 in Redcar and Cleveland LA (from 29 to 26). Over the same period, actual possessions fell by 17.6% to 14. Meanwhile, mortgage claims and possessions fell over the same period.

In the final quarter of 2014, Redcar and Cleveland Council made 9 homelessness decisions and accepted no households as being homeless and in priority need. At the end of 2014, 8 households were housed in temporary accommodation, a fall of 33.3% on the quarter ending in June.

Some have pointed to a lack of new affordable homes being built as a reason behind the increase in homelessness. The latest annual figures show that in Redcar and Cleveland LA, while the number of new homes started have increased and completed homes have fallen (2012/13 to 2013/14), the proportion in the social sector starts has increased while that of social completions has fallen.

Looking at quarterly building statistics, in the final quarter of 2014, there were 30 dwellings started and 100 completed in Redcar and Cleveland LA. While no started dwellings were in the social sector, 40% completed dwellings were social. In the corresponding quarter of 2013, 30% of dwellings started and 12.5% of completions were in the social sector.

Nomis data (2011) shows that in the constituency, 66% are owner-occupiers, 22% rent from a social landlord and 12% are private renters. However, looking at tenure by the age of the household reference person shows changes by age. There is a steep increase in owner-occupation between the ages of 24 and under (14%) and 50 to 64 year age bracket (73%) before falling to 65% for those aged 85 and over. Conversely, renting is more popular for those aged 24 and below (86%) before falling and then increasing slightly in later years.
