

Hartlepool Parliamentary Constituency

This is the second bulletin of 2015 produced by Northern Housing Consortium (NHC) providing analysis of housing-related data for the Parliamentary Constituencies in the North of England. The report provides analysis of the impacts of welfare reform and the housing market in the constituency.

We have used the following symbols to indicate your performance against the relevant regional or national statistics.

Financial Distress

ONS figures show that in the year ending in June 2015, there were 38,000 people aged over 16 years old in employment (64.2%) in Hartlepool. There are 32,000 jobs in the constituency which equates to 0.55 jobs per 16-64 year old compared to 0.68 across the North East.

Experimental Jobseekers Allowance and out of work Universal Credit statistics produced by Jobcentre Plus shows that there were 2,540 such claimants in November 2015 (4.4% of 16-64 year olds), which is a similar level as in the previous year. This compares to 2.8% of people in the region (a 0.4% decrease).

The latest Government data shows that there were 21,130 children in low income families in the constituency in August 2013 (27.6% of all children). Over four-fifths were in families in receipt of Income Support or Jobseekers Allowance while 9.6%, in families in receipt of Council Tax Credit and with less than 60% of median income.

Headland and Harbour ward (40.1%) had the greatest concentration of such children followed by Manor House (40%). Jesmond also has a higher than average proportion of children living in a family in receipt of Income Support or JSA (90.2%).

Housing Market

In 2014/15, there were 27 homeless acceptances by Hartlepool Council. This is a 50% increase on the 18 acceptances in 2009/10. Of these, no households were found temporary accommodation but there were 25 cases of a duty being owed but no accommodation found.

In October 2014, the total number of vacant homes was 1,554. This is a 17.3% decrease from 1,879 in 2009 compared with the 13.8% decrease in the North East. Long-term vacants fell by 15.4% over the same period. There was a total of 301 social housing vacants and 14 were classed as long-term vacant (4.7%) which is a decrease from 18 in the previous year.

As at April 2014, there were 2,615 households on the housing waiting list in Hartlepool. This is a 2% increase on the previous year of 2,563. However, this figure represented a fall on previous years and the long-term trend is a 31.1% decrease on 2009 figures.

There are clear signs of a recovery in the housing market in the constituency with an overall increase in sales between 2009 and 2014 (41.5%) with greatest increase in sales of detached properties and a fall in sales of flats and maisonettes (ONS). The data also shows median house prices being at their highest level in 2014 (£120,000).

As figure 2 shows, median house prices and pay have not grown at the same rate. Median gross house prices growth outstripped that of median pay in 2014. As a result, the affordability ratio grew to 5.7 from 5.6 between 2013 and 2014.
