

Burnley Parliamentary Constituency

This is the first bulletin of 2015 produced by Northern Housing Consortium (NHC) providing analysis of housing-related data for the Parliamentary Constituencies in the North of England. The report provides analysis of the impacts of welfare reform and the housing market in the constituency.

We have used the following symbols to indicate your performance against the relevant regional or national statistics.

Financial Distress

Census data shows that in Burnley, 69.6% of working aged people were working full-time and 30.4% worked part-time. The corresponding figures for the region are 70.3% and 29.7%.

The Annual Survey of Salaries and Hours (ASHE) shows that in the constituency (as a place of work), 23.2% of all employee jobs paid below the Living Wage in 2014 (£7.65ph), a decrease from 24.4% in 2013. This compares to 23.6% regionally and 21.7% nationally.

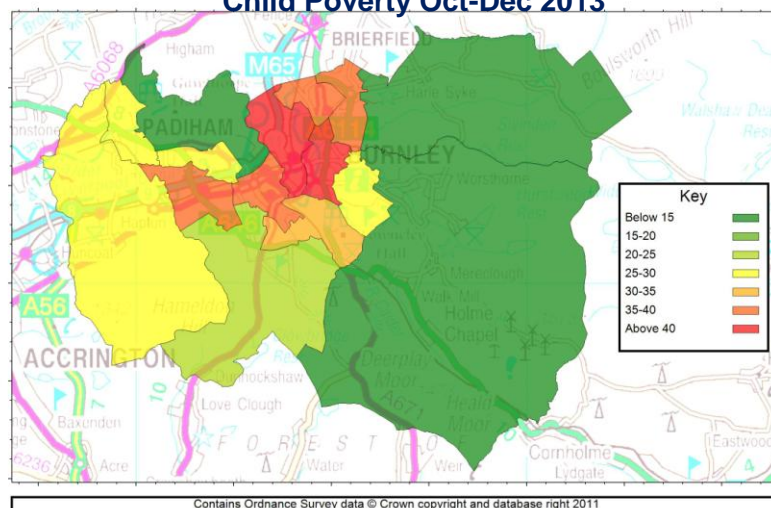

In the constituency, between September 2013 and September 2014, total Benefit sanctions fell by 69.7%. Employment and Support Allowance sanctions fell from 8 to none in the same period. Meanwhile, Job Seekers Allowance sanctions fell from 263 to 82 (-68.8%).

In a previous edition of the Constituency Profiles, we reported that in Burnley, 28% of children live in poverty. One year on, we can report that figure, before housing costs, stands at 21.2%. However, when housing costs are taken into account, 32.8% of children live in poverty (End Child Poverty) and the map below shows that Daneshouse with Stoneyholme (50%) is the worst affected ward.

Child Poverty Oct-Dec 2013

Burnley Parliamentary Constituency

Housing Market

After being on a general downward trend between Q1 2013 to Q2 2014, social landlord possession claims grew by 21.7% between Q2 2014 and Q4 2014 in Burnley LA (23 to 28). Over the same period, there were no actual possessions. Meanwhile, mortgage claims fell but possessions increased over the same period.

In the final quarter of 2014, Burnley Council made 42 homelessness decisions and accepted 12 households as being homeless and in priority need (28.6%). At the end of 2014, there were 6 households housed in temporary accommodation, a similar number as in the quarter ending in June.

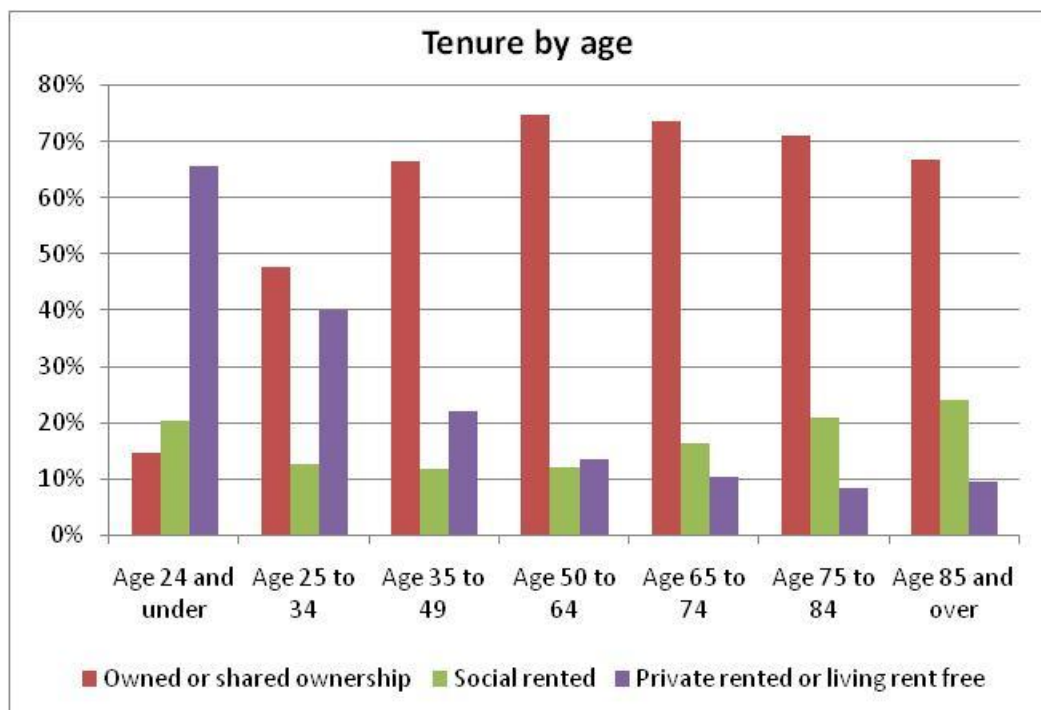

Some have pointed to a lack of new affordable homes being built as the reason behind the increase in homelessness in some areas. The latest annual figures show that in Burnley LA, the number of new starts have fallen but completed homes have increased (2012/13 to 2013/14), and that no started dwellings were in the social sector but 7.1% of completions were.

Looking at quarterly building statistics, in the final quarter of 2014, there were no dwellings started and 20 completed in Burnley LA. No dwellings completions in the social sector were which is a similar picture as in the corresponding quarter of 2013.

Nomis data (2011) shows that in the constituency, 65% are owner-occupiers, 14% rent from a social landlord and 21% are private renters. However, looking at tenure by the age of the household reference person shows changes by age. There is a steep increase in owner-occupation between the ages of 24 and under (14%) and 50 to 64 year age bracket (75%) before falling to 67% for those aged 85 and over. Conversely, renting is more popular for those aged 24 and below (86%) before falling and then increasing slightly in later years.
