

Preston Parliamentary Constituency

This is the first bulletin of 2015 produced by Northern Housing Consortium (NHC) providing analysis of housing-related data for the Parliamentary Constituencies in the North of England. The report provides analysis of the impacts of welfare reform and the housing market in the constituency.

We have used the following symbols to indicate your performance against the relevant regional or national statistics.

Financial Distress

Census data shows that in Preston, 66.5% of working aged people were working full-time and 33.5% worked part-time. The corresponding figures for the region are 70.3% and 29.7%.

The Annual Survey of Salaries and Hours (ASHE) shows that in the constituency (as a place of work), 24.1% of all employee jobs paid below the Living Wage in 2014 (£7.65ph), an increase from 23.9% in 2013. This compares to 23.6% regionally and 21.7% nationally.

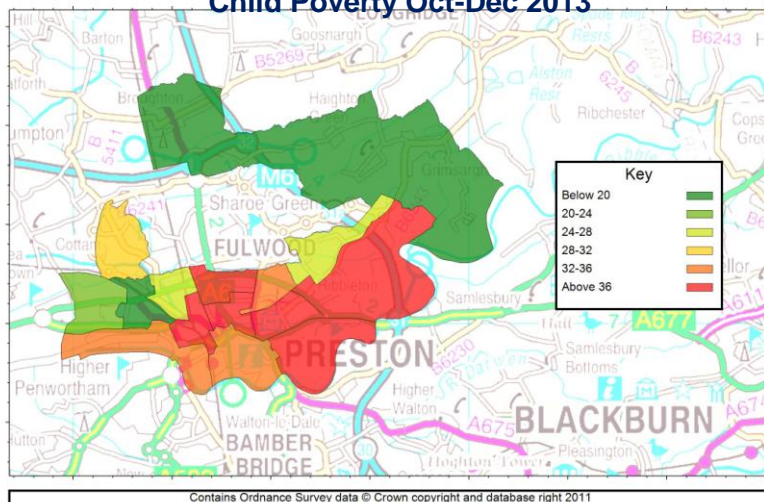

In the constituency, between September 2013 and September 2014, total Benefit sanctions fell by 56.7%. Employment and Support Allowance sanctions fell from 16 to 12 over this period. Meanwhile, Job Seekers Allowance sanctions fell from 217 to 89 (-59%).

In a previous edition of the Constituency Profiles, we reported that in Preston, 29% of children live in poverty. One year on, we can report that figure, before housing costs, stands at 20.9%. However, when housing costs are taken into account, 32.7% of children live in poverty (End Child Poverty) and the map below shows that Ribbleson (40.2%) is the worst affected ward.

Child Poverty Oct-Dec 2013

Housing Market

After being on a general downward trend between Q1 2013 to Q2 2014, social landlord possession claims have fallen further by 6.1% between Q2 2014 and Q4 2014 in Preston LA (from 49 to 46). Over the same period, there has been an increase in actual possessions (46.7%). Meanwhile, mortgage claims have fallen over the same period.

In the final quarter of 2014, Preston Council made 25 homelessness decisions and accepted 17 households as being homeless and in priority need (68%). At the end of 2014, there were 17 households housed in temporary accommodation, a 54.5% increase on the quarter ending in June.

Some have pointed to a lack of new affordable homes being built as the reason behind the increase in homelessness in some areas. The latest annual figures show that in Preston LA, while the number of new starts and completed homes have risen (2012/13 to 2013/14), the proportion in the social sector has also increased for both.

Looking at quarterly building statistics, in the final quarter of 2014, there were 50 dwellings started and 10 completed in Preston LA. No started or completed dwellings were in the social sector, whereas in the corresponding quarter of 2013, 36% of starts were in the social sector

Nomis data (2011) shows that in the constituency, 52% are owner-occupiers, 25% rent from a social landlord and 23% are private renters. However, looking at tenure by the age of the household reference person shows changes by age. There is a steep increase in owner-occupation between the ages of 24 and under (10%) and 75 to 84 year age bracket (69%) before falling to 64% for those aged 85 and over. Conversely, renting is more popular for those aged 24 and below (90%) before falling and then increasing slightly in later years.
