

# Stockport Parliamentary Constituency

This is the first bulletin of 2015 produced by Northern Housing Consortium (NHC) providing analysis of housing-related data for the Parliamentary Constituencies in the North of England. The report provides analysis of the impacts of welfare reform and the housing market in the constituency.

We have used the following symbols to indicate your performance against the relevant regional or national statistics.

## Financial Distress

Census data shows that in Stockport, 72.9% of working aged people were working full-time and 27.1% worked part-time.

The Annual Survey of Salaries and Hours (ASHE) shows that in the constituency (as a place of work), 20.7% of all employee jobs paid below the Living Wage in 2014 (£7.65ph), an increase from 17.2% in 2013. This compares to 23.6% regionally and 21.7% nationally.

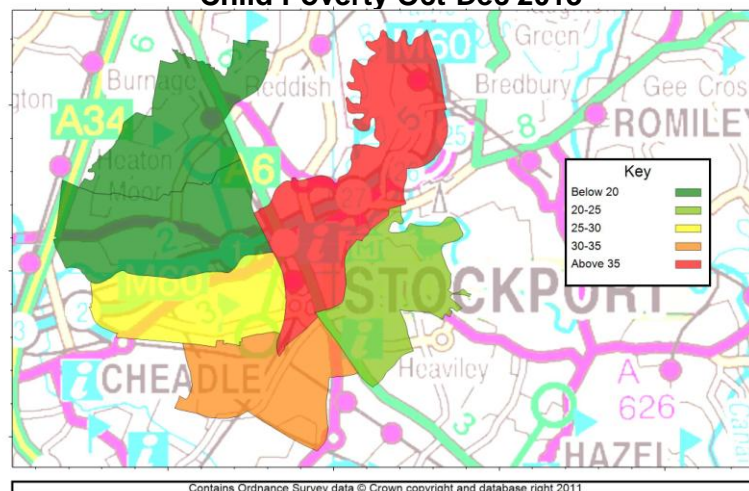

In the constituency, between September 2013 and September 2014, total Benefit sanctions fell by 28.3%. Employment and Support Allowance sanctions grew from 9 to 22 over this period (144.4%). Meanwhile, Job Seekers Allowance sanctions fell from 171 to 107 (-37.4%).

In a previous edition of the Constituency Profiles, we reported that in Stockport, 24% of children live in poverty. One year on, we can report that figure, before housing costs, stands at 17.2%. However, when housing costs are taken into account, 27.2% of children live in poverty (End Child Poverty) and the map below shows that Brinnington and Central (39.7%) is the worst affected ward.

**Child Poverty Oct-Dec 2013**

# Stockport Parliamentary Constituency

## Housing Market

After being on a general downward trend between Q1 2013 to Q2 2014, social landlord possession claims fell further by 2% between Q2 2014 and Q4 2014 in Stockport LA (from 104 to 100). Over the same period, actual possessions remained constant at 37. Meanwhile, mortgage claims and possessions fell over the same period.

In the final quarter of 2014, Stockport Council made 88 homelessness decisions and accepted 39 households as being homeless and in priority need (44.3%). At the end of 2014, 42 households were housed in temporary accommodation, an increase of 20% on the quarter ending in June.

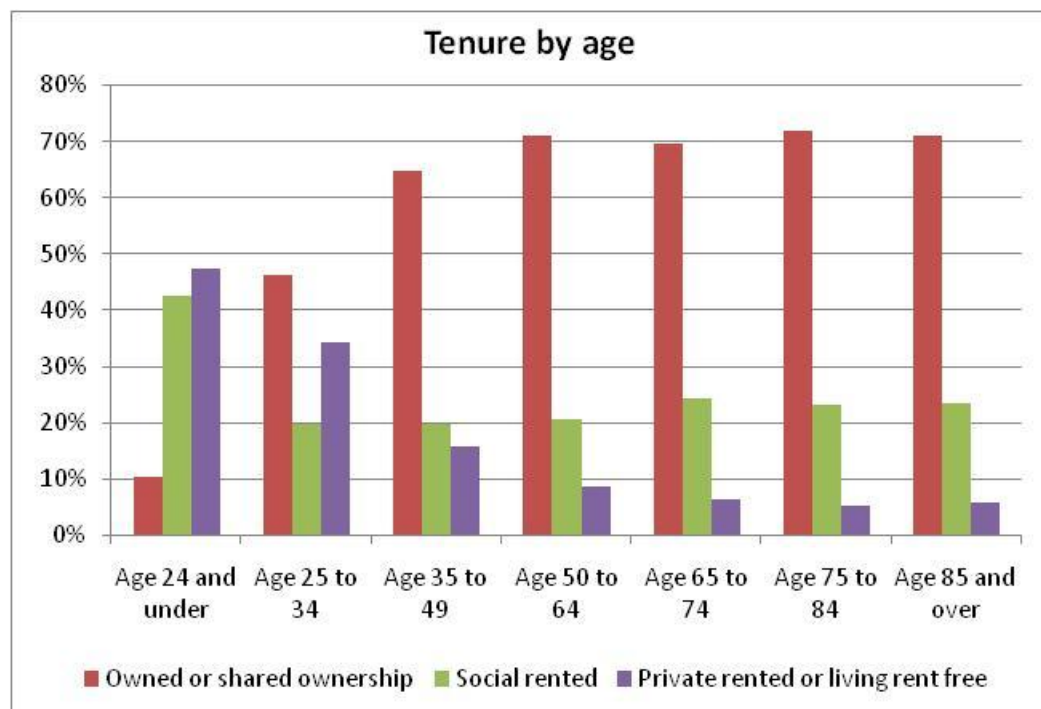

Some have pointed to a lack of new affordable homes being built as the reason behind the increase in homelessness. The latest annual figures show that in Stockport LA, while the number of new homes started has increased and dwellings completed has fallen (2012/13 to 2013/14), the proportion in the social sector has decreased for both.

Looking at quarterly building statistics, in the final quarter of 2014, there were 50 dwellings started and 40 completed in Stockport LA. While no started dwellings were in the social sector, one-quarter of completed dwellings were social. In the corresponding quarter of 2013, no dwellings started or completed were in the social sector.

Nomis data (2011) shows that in the constituency, 62% are owner-occupiers, 22% rent from a social landlord and 16% are private renters. However, looking at tenure by the age of the household reference person shows changes by age. There is a steep increase in owner-occupation between the ages of 24 and under (10%) and 75 to 84 year age bracket (72%) before falling to 71% for those aged 85 and over. Conversely, renting is more popular for those aged 24 and below (90%) before falling and then increasing slightly in later years.
