

# Wallasey Parliamentary Constituency

This is the first bulletin of 2015 produced by Northern Housing Consortium (NHC) providing analysis of housing-related data for the Parliamentary Constituencies in the North of England. The report provides analysis of the impacts of welfare reform and the housing market in the constituency.

We have used the following symbols to indicate your performance against the relevant regional or national statistics.

## Financial Distress

Census data shows that in Wallasey, 69.5% of working aged people were working full-time and 30.5% worked part-time. The corresponding figures for the region are 70.3% and 29.7%.

The Annual Survey of Salaries and Hours (ASHE) shows that in the constituency (as a place of work), 23.4% of all employee jobs paid below the Living Wage in 2014 (£7.65ph), a decrease from 27.1% in 2013. This compares to 23.6% regionally and 21.7% nationally.

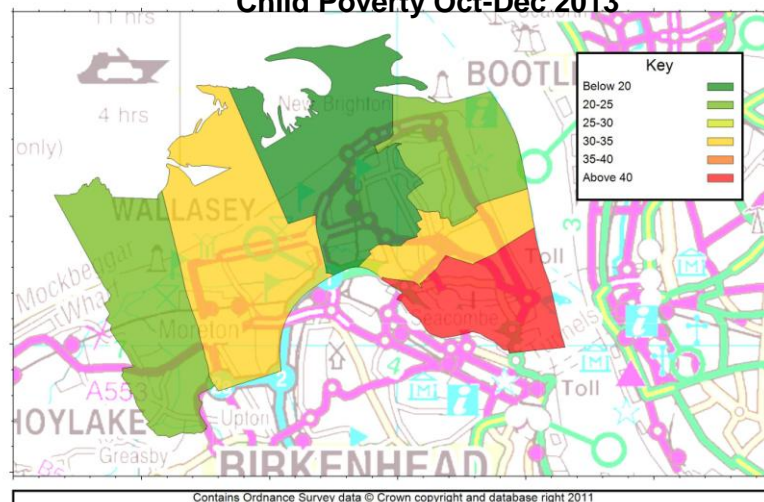

In the constituency, between September 2013 and September 2014, total Benefit sanctions fell by 68.1%. Employment and Support Allowance sanction fell from 7 to none in the same period. Meanwhile, Job Seekers Allowance sanctions fell from 156 to 52 (-66.7%).

In a previous edition of the Constituency Profiles, we reported that in Wallasey, 28% of children live in poverty. One year on, we can report that figure, before housing costs, stands at 18.5%. However, when housing costs are taken into account, 29.3% of children live in poverty (End Child Poverty) and the map below shows that Seacombe (40.8%) is the worst affected ward.

**Child Poverty Oct-Dec 2013**

## Housing Market

After being on a general downward trend between Q1 2013 to Q2 2014, social landlord possession claims fell further by 3.4% between Q2 2014 and Q4 2014 in Wirral (from 118 to 114). Over the same period, actual possessions also fell by 41.2% to 37. Meanwhile, mortgage claims also fell by 43.1% and actual possessions grew by 38.9% over the same period.

In the final quarter of 2014, Wirral Council made 53 homelessness decisions and accepted 26 households as being homeless and in priority need (49.1%). At the end of 2014, 7 households were housed in temporary accommodation, compared to none in the quarter ending in June.

Some have pointed to a lack of new affordable homes being built as the reason behind the increase in homelessness. The latest annual figures show that in Wirral, while the number of new homes started and completed has increased (2012/13 to 2013/14), the proportion in the social sector has increased for both.

Looking at quarterly building statistics, in the final quarter of 2014, there were 20 dwellings started and 110 completed in Wirral. While no started dwellings were in the social sector, almost three-quarters of completed dwellings were social. In the corresponding quarter of 2013, 33.3% of dwellings started and 28.6% of completed were in the social sector.

Nomis data (2011) shows that in the constituency, 65% are owner-occupiers, 14% rent from a social landlord and 21% are private renters. However, looking at tenure by the age of the household reference person shows changes by age. There is a steep increase in owner-occupation between the ages of 24 and under (13%) and 65 to 74 year age bracket (75%) before falling to 69% for those aged 85 and over. Conversely, renting is more popular for those aged 24 and below (87%) before falling and then increasing slightly in later years.
