

## Bolton West Parliamentary Constituency

This is the second bulletin of 2015 produced by Northern Housing Consortium (NHC) providing analysis of housing-related data for the Parliamentary Constituencies in the North of England. The report provides analysis of the impacts of welfare reform and the housing market in the constituency.

We have used the following symbols to indicate your performance against the relevant regional or national statistics.

### Financial Distress

ONS figures show that in the year ending in June 2015, there were 52,000 people aged over 16 years old in employment (75.4%) in Bolton West. There are 40,000 jobs in the constituency which equates to 0.67 jobs per 16-64 year old compared to 0.77 across the North West.

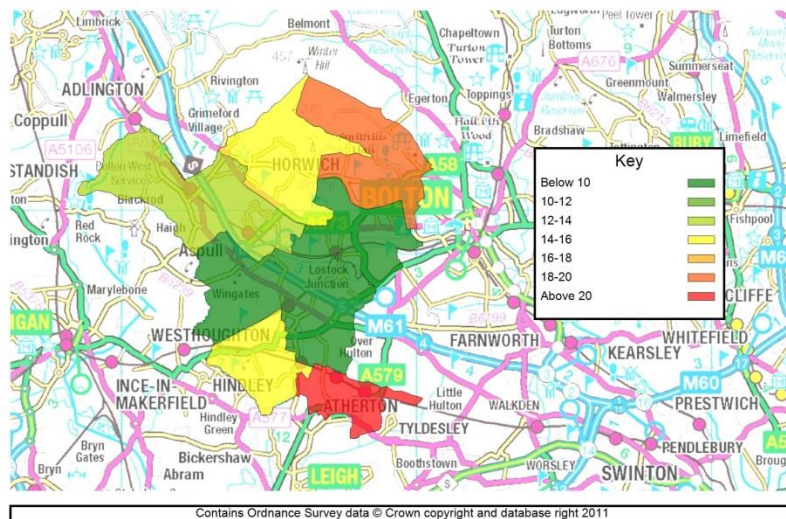

Experimental Jobseekers Allowance and out of work Universal Credit statistics produced by Jobcentre Plus shows that there were 1,215 such claimants in November 2015 (2.0% of 16-64 year olds), which is 0.1% increase the previous year. This compares to 2.4% of people in the region (a 0.1% increase).

The latest Government data shows that there were 20,560 children in low income families in the constituency in August 2013 (15.4% of all children). Almost four-fifths were in families in receipt of Income Support or Jobseekers Allowance while 16.1%, in families in receipt of Council Tax Credit and with less than 60% of median income.

Atherton ward (26.8%) had the greatest concentration of such children followed by Smithills (19.5%). Atherton also has a higher than average proportion of children living in a family in receipt of Income Support or JSA (84.7%).

## Housing Market

In 2014/15, there were 277 homeless acceptances by Bolton Council. This is a 6.5% increase on the 260 acceptances in 2009/10. Of these, 44 households were found temporary accommodation and there were 39 households that were not found accommodation at the end of March 2015 despite a duty being owed.

In October 2014, the total number of vacant homes was 4,618. This is a 25.5% fall from 6,196 in 2009 compared with the 37.5% fall in Greater Manchester. Long-term vacants fell by 49.7% over the same period. There was a total of 393 social vacants and 216 were classed as long-term vacant (54.9%) which is a fall from 220 in the previous year.

As at April 2014, there were 18,352 households on the housing waiting list in Bolton. This is a 7.3% increase on the previous year of 17,097. However, this figure represented a large fall on previous years and the long-term trend is a 16.7% decrease on 2009 figures.

There are clear signs of a recovery in housing market with year-on-year increases in sales between 2009 and 2014 (40.5%) with greatest increase in sales of detached properties and a fall in sales of flats and maisonettes (ONS). The data also shows house price increase at their highest level since 2008 (£130,000).

As figure 2 shows, median house prices and pay have not grown at the same rate. Median house prices grew in 2014 while median pay fell (ASHE). As a result, the affordability ratio grew to 6.1 from 5.7 between 2012 and 2013.
