

Fylde Parliamentary Constituency

This is the second bulletin of 2015 produced by Northern Housing Consortium (NHC) providing analysis of housing-related data for the Parliamentary Constituencies in the North of England. The report provides analysis of the impacts of welfare reform and the housing market in the constituency.

We have used the following symbols to indicate your performance against the relevant regional or national statistics.

Financial Distress

ONS figures show that in the year ending in June 2015, there were 38,000 people aged over 16 years old in employment (74.1%) in Fylde. There are 48,000 jobs in the constituency which equates to 0.98 jobs per 16-64 year old compared to 0.77 across the North West.

Experimental Jobseekers Allowance and out of work Universal Credit statistics produced by Jobcentre Plus shows that there were 665 such claimants in November 2015 (1.4% of 16-64 year olds), which is a similar level as in the previous year. This compares to 2.4% of people in the region (a 0.1% increase).

The latest Government data shows that there were 14,980 children in low income families in the constituency in August 2013 (10.7% of all children). Almost three-quarters were in families in receipt of Income Support or Jobseekers Allowance while 18.3%, in families in receipt of Council Tax Credit and with less than 60% of median income.

Kilnhouse ward (23.2%) had the greatest concentration of such children followed by Freckleton East (17.8%). Freckleton East also has a higher than average proportion of children living in a family in receipt of Income Support or JSA (83.3%).

Housing Market

In 2014/15, there were 11 homeless acceptances by Fylde Council. This is an 8.3% decrease on the 12 acceptances in 2009/10. A total of 11 households were found temporary accommodation and there were no households that were not found accommodation at the end of March 2015 despite a duty being owed.

In October 2014, the total number of vacant homes was 1,702. This is a 7.1% decrease from 1,831 in 2009 compared with the 7.9% decrease in Lancashire. Long-term vacants fell by 32.9% over the same period. There was a total of 26 social vacants and none were classed as long-term vacant.

As at April 2014, there were 2,947 households on the housing waiting list in Fylde. This is a 123.3% increase on the previous year 1,320. Furthermore, this figure represented a rise on previous years and the long-term trend is a 14.3% increase on 2009 figures.

There are some clear signs of a recovery in the housing market with an increase in sales between 2009 and 2014 (61.6%) with greatest increase in sales of flats and maisonettes (ONS). The data also shows median house prices were highest since 2010 (£170,750).

As figure 2 shows, median house prices and pay have not grown at the same rate. Median house price growth outstripped that of median gross pay (ASHE) in 2014. As a result, the affordability ratio grew to 7.7 from 7.5 between 2013 and 2014.
