

Stockport Parliamentary Constituency

This is the second bulletin of 2015 produced by Northern Housing Consortium (NHC) providing analysis of housing-related data for the Parliamentary Constituencies in the North of England. The report provides analysis of the impacts of welfare reform and the housing market in the constituency.

We have used the following symbols to indicate your performance against the relevant regional or national statistics.

Financial Distress

ONS figures show that in the year ending in June 2015, there were 40,000 people aged over 16 years old in employment (76.4%) in Stockport. There are 57,000 jobs in the constituency which equates to 1.01 jobs per 16-64 year old compared to 0.77 across the North West.

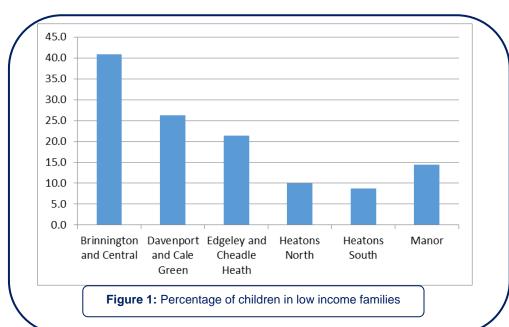

Experimental Jobseekers Allowance and out of work Universal Credit statistics produced by Jobcentre Plus shows that there were 1,690 such claimants in November 2015 (3.0% of 16-64 year olds), which is a similar level as in the previous year. This compares to 2.4% of people in the region (a 0.1% increase).

The latest Government data shows that there were 19,965 children in low income families in the constituency in August 2013 (21.5% of all children). Over four-fifths were in families in receipt of Income Support or Jobseekers Allowance while 11.9%, in families in receipt of Council Tax Credit and with less than 60% of median income.

Brinnington and Central ward (40.9%) had the greatest concentration of such children followed by Davenport and Cale Green (26.3%). Brinnington and Central also has a higher than average proportion of children living in a family in receipt of Income Support or JSA (89.7%).

Housing Market

In 2014/15, there were 146 homeless acceptances by Stockport Council. This is an 18.7% increase on the 123 acceptances in 2009/10. Of these, 37 households were found temporary accommodation. There were 7 cases of a duty being owed but no accommodation found.

In October 2014, the total number of vacant homes was 3,283. This is a 12.4% fall from 3,748 in 2009 compared with the 37.5% fall in Greater Manchester. Long-term vacants fell by 27.3% over the same period. There was a total of 117 housing association vacants but only 6 were classed as long-term vacant (5.1%) which is a fall from 11 in the previous year.

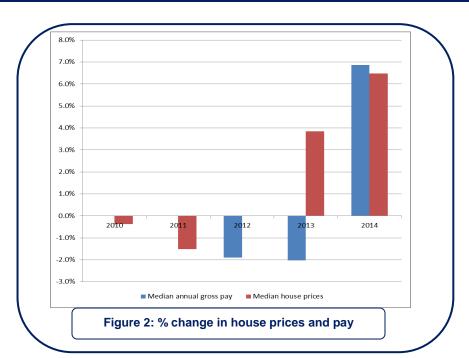

As at April 2014, there were 6,439 households on the housing waiting list in Stockport. This is an 8% increase on 5,962 in the previous year. However, this figure represented a fall on previous years and the long-term trend is a 24.8% fall on 2009 figures.

There are clear signs of a recovery in housing market with an overall increase in sales between 2009 and 2014 (77.3%) with greatest sales of detached properties (ONS). The data also shows house prices being their highest in 2014 (£143,750).

As figure 2 shows, median house prices and pay have not grown at the same rate. Median gross pay (ASHE) growth outstripped that of media house in 2014. As a result, the affordability ratio fell to 6.1 from 6.2 between 2013 and 2014.
