

Middlesbrough Parliamentary Constituency

This is the first bulletin of 2016 produced by Northern Housing Consortium (NHC) providing analysis of housing-related data for the Parliamentary Constituencies in the North of England. The report provides analysis of the impacts of welfare reform and the housing market in the constituency.

We have used the following symbols to indicate your performance against the relevant regional or national statistics.

Economic Activity

Neighbourhood Statistics shows that there are 68,251 residents in Middlesbrough aged between 16 and 74. Of these, 61.5% are economically active (this includes unemployed and actively looking for work) which compares to 66.2% in Tees Valley and 66.2% for the region as a whole.

The latest economically active figures are an increase on those from the 2001 Census. In 2001, there were 56.1% of residents aged 16 to 74 classed as economically active. This coincides with an increase in the number of people aged 16 to 74.

Figure 1 below shows (where data is available) economically active are concentrated in Acklam (71.2%) and Linthorpe (70.7%) wards having highest proportions of economically active 16 to 74 year olds.

Of the economically active total, 46.8% are full-time employees, while 23.4% work part-time employees. A further 7.9% are self-employed and 13.6% are unemployed (and looking for work). The proportion of those in employment has fallen by 5.5% since 2001.

Benefits and affordability

Nomis data showed that in June, there were 3,205 Universal Credit and Job Seekers Allowance claimants in the constituency, a rise from 2,905 at the same point in 2015. This represents 5.2% of people aged over 16 in the constituency with 25-34 year olds making up 29.2% of claimants.

Using these indicators, it would appear that the Government's aim of a lower welfare country is not being achieved. However, annual survey of hours and earnings data shows that hourly pay for full-time workers grew between 2014 to 2015 from £10.74 to £11.66 – delivering on the higher wage 'settlement'.

Coinciding with the rise in full-time hourly earnings, Ministry of Justice figures show that total housing possession claims (-28%) and actual possessions (-25%) fell in the first quarter of 2016 compared to the same period of 2015 in the local authority area.

As Figure 2 shows social landlord claims (-32.1%) and possessions (-12%) both fell over this period as did private landlord claims (-14.3%), while there have been no private landlord possessions in recent years.

In the mortgage market, claims fell by 8.7% and possessions fell by 46.7%.
