

Sunderland Central Parliamentary Constituency

This is the first bulletin of 2016 produced by Northern Housing Consortium (NHC) providing analysis of housing-related data for the Parliamentary Constituencies in the North of England. The report provides analysis of the impacts of welfare reform and the housing market in the constituency.

We have used the following symbols to indicate your performance against the relevant regional or national statistics.

Economic Activity

Neighbourhood Statistics shows that there are 75,066 residents in Sunderland Central aged between 16 and 74. Of these, 64.9% are economically active (this includes unemployed and actively looking for work) which compares to 66.4% in Tyne & Wear and 66.2% for the region as a whole.

The latest economically active figures are an increase on those from the 2001 Census. In 2001, there were 58.3% of residents aged 16 to 74 classed as economically active. This coincides with an increase in the number of people aged 16 to 74.

Figure 1 below shows economically active are concentrated in Fulwell (70.2%) and Ryhope (68%) wards having highest proportions of economically active 16 to 74 year olds.

Of the economically active total, 53.7% are full-time employees, while 20.9% work part-time employees. A further 8.6% are self-employed and 9.5% are unemployed (and looking for work). The proportion of those in employment has fallen by 3.5% since 2001.

Benefits and affordability

Nomis data showed that in June, there were 1,930 Universal Credit and Job Seekers Allowance claimants in the constituency, a fall from 2,035 at the same point in 2015. This represents 2.9% of people aged over 16 in the constituency with 25-34 year olds making up 24.2% of claimants.

Using these indicators, it would appear that the Government's aim of a lower welfare country is being achieved. However, annual survey of hours and earnings data shows that hourly pay for full-time workers fell between 2014 to 2015 from £11.87 to £11.77 – failing to deliver on the higher wage 'settlement'.

Coinciding with the fall in full-time hourly earnings, Ministry of Justice figures show that total housing possession claims (7.8%) actual possessions (69.2%) grew in the first quarter of 2016 compared to the same period of 2015 in the local authority area.

As Figure 2 shows only mortgage claims fell (-30%) between the first quarter of 2015 and that of 2016. However, there have been no report private landlord possessions in recent years.

Greatest increases were seen in social landlord possessions (125%) and private landlord claims (57.1%). There were also increases in social landlord claims (23.7%) and mortgage possessions (21.4%).
