

## Tynemouth Parliamentary Constituency

This is the first bulletin of 2016 produced by Northern Housing Consortium (NHC) providing analysis of housing-related data for the Parliamentary Constituencies in the North of England. The report provides analysis of the impacts of welfare reform and the housing market in the constituency.

We have used the following symbols to indicate your performance against the relevant regional or national statistics.

### Economic Activity

Neighbourhood Statistics shows that there are 71,894 residents in Tynemouth aged between 16 and 74. Of these, 70.3% are economically active (this includes unemployed and actively looking for work) which compares to 66.4% in Tyne & Wear and 66.2% for the region as a whole.

The latest economically active figures are an increase on those from the 2001 Census. In 2001, there were 64.7% of residents aged 16 to 74 classed as economically active. This coincides with an increase in the number of people aged 16 to 74.

Figure 1 below shows economically active are concentrated in Whitley Bay (74.1%) and Valley (73.9%) wards having highest proportions of economically active 16 to 74 year olds.

Of the economically active total, 58.3% are full-time employees, while 21% work part-time employees. A further 10.6% are self-employed and 6.1% are unemployed (and looking for work). The proportion of those in employment has fallen by 3% since 2001.

## Benefits and affordability

Nomis data showed that in June, there were 1,190 Universal Credit and Job Seekers Allowance claimants in the constituency, a rise from 1,185 at the same point in 2015. This represents 1.9% of people aged over 16 in the constituency with 25-34 year olds making up 23.6% of claimants.

Using these indicators, it would appear that the Government's aim of a lower welfare country is not being achieved. However, annual survey of hours and earnings data shows that hourly pay for full-time workers grew between 2014 to 2015 from £13.82 to £14.72 – delivering on the higher wage 'settlement'.

Notwithstanding the rise in full-time hourly earnings, Ministry of Justice figures show that total housing possession claims grew (52.2%) but that actual possessions (-36.4%) fell in the first quarter of 2016 compared to the same period of 2015 in the local authority area.

As Figure 2 shows mortgage possessions fell over this period from 12 to none (-100%), while there was no change in mortgage claims (22) or social landlord possessions (21). There had been no mortgage claims since 2012.

However, there were increases in social landlord claims (68.3%) and private landlord claims (9.1%) in 2016 Q1 compared with the corresponding quarter of 2015.
