

Salford and Eccles Parliamentary Constituency

This is the first bulletin of 2016 produced by Northern Housing Consortium (NHC) providing analysis of housing-related data for the Parliamentary Constituencies in the North of England. The report provides analysis of the impacts of welfare reform and the housing market in the constituency.

We have used the following symbols to indicate your performance against the relevant regional or national statistics.

Economic Activity

Neighbourhood Statistics shows that there are 84,084 residents in Salford and Eccles aged between 16 and 74. Of these, 68.9% are economically active (this includes unemployed and actively looking for work) which compares to 67.8% in Greater Manchester and 67.8% for the region as a whole.

The latest economically active figures are an increase on those from the 2001 Census. In 2001, there were 60.6% of residents aged 16 to 74 classed as economically active. This coincides with an increase in the number of people aged 16 to 74.

Figure 1 below shows economically active are concentrated in Ordsall (77.4%) and Claremont (74.2%) wards having highest proportions of economically active 16 to 74 year olds.

Of the economically active total, 59% are full-time employees, while 16.3% work part-time employees. A further 8.5% are self-employed and 7.3% are unemployed (and looking for work). The proportion of those in employment has fallen by 4.7% since 2001.

Benefits and affordability

Nomis data showed that in June, there were 2,120 Universal Credit and Job Seekers Allowance claimants in the constituency, a rise from 1,770 at the same point in 2015. This represents 2.7% of people aged over 16 in the constituency with 25-34 year olds making up 28.8% of claimants.

Using these indicators, it would appear that the Government's aim of a lower welfare country is not being achieved. Furthermore, annual survey of hours and earnings data shows that hourly pay for full-time workers fell between 2014 to 2015 from £11.55 to £11.26 – failing to deliver the higher wage 'settlement'.

Notwithstanding the fall in full-time hourly earnings, Ministry of Justice figures show that total housing possession claims fell by 10.2% in the first quarter of 2016 compared to the same period of 2015 in the local authority area and that possessions decreased by 10% over this period.

As Figure 2 shows the greatest proportionate decrease was in mortgage possessions (-46.7%) followed by mortgage claims (-21.9%) over this period. There were also falls in social landlord claims (-10%) and possessions (-15.4%).

The only increase in possession actions over this same period was in private landlord possessions which grew from none to 9. Private claims remained at a constant level (33).
