Additional Social Care Funding

Mid-2015 population estimates by ONS showed the population of Newcastle to be 292,883. Figure 1 below shows how the population is broken down by age groups.

These mid-2015 population estimates shows that 26.4% of the population is aged 20 or below. However, there are a total of 28,893 people in the area aged 70 or over (9.9%).

In his Budget, the Chancellor announced a total of just over £2bn in funding for social care over the three years between 2017/18 and 2019/20. Newcastle's allocation of this additional funding totalled just under £13.5m over the three years (11% of the North East allocation).

Comparing these funding and over-70s estimates, it can be calculated that the 2017/18 allocation equates to £224.03 for each person aged over 70. This falls to £148.61 in 2018/19 and £73.51 in 2019/20.

Housing Supply

The Communities and Local Government (CLG) Committee closed an inquiry on the dissolution of Parliament on 3rd May without a concluding report into whether the housing on offer in England for older people is sufficiently available and suitable for their needs.

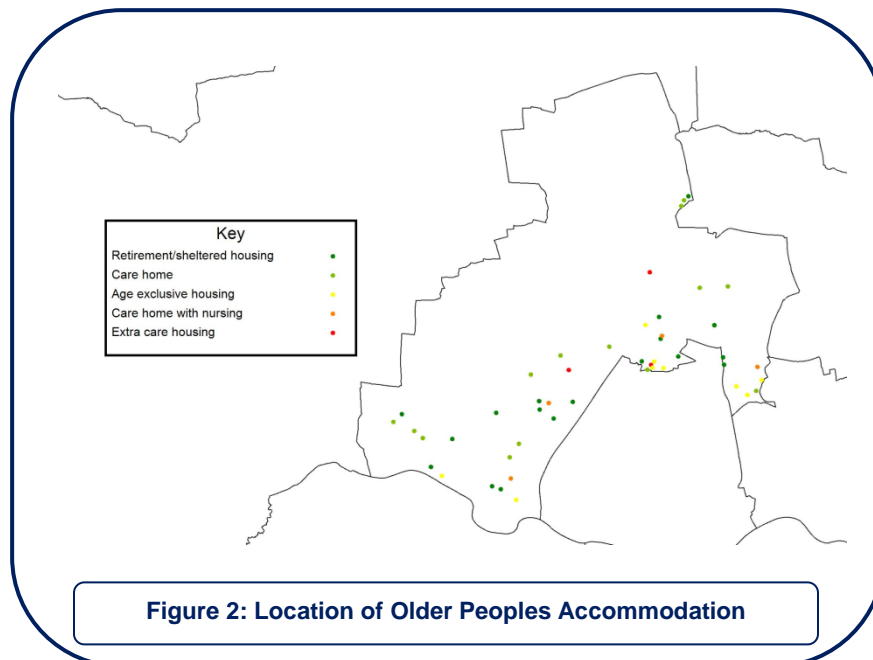

The inquiry followed research which indicated pensioners are stuck in oversized properties worth £820bn and was launched to a backdrop of significant housing shortages, rising numbers of older people, pressures on adult social care and with just 2% of the country's housing stock designed with pensioners in mind.

An examination of data held on housingcare.org website shows that there are 51 specialist accommodation schemes for older people in the constituency. The most common type of scheme is retirement/sheltered housing (35%) followed by care homes (29%).

Figure 2 below shows the location of the different specialist housing schemes for older people in the constituency.
