

## Stretford and Urmston Parliamentary Constituency

This is the first bulletin of 2018 produced by Northern Housing Consortium (NHC) providing analysis of housing-related data for the Parliamentary Constituencies in the North of England. The report provides analysis of the housing make up and market and of deprivation in the constituency.

We have used the following symbols to indicate your performance against the relevant regional or national statistics.

### Housing Market and Stock Condition

As Figure 1 below shows, almost two-thirds of the housing stock in the constituency and region are in owner-occupation. Conversely, the proportion of social (22.1%) is higher than the regional average while the private rented share of the stock (11.8%) is lower than the regional figure.

Latest figures show that there are 687 long-term empty homes in Trafford and a further 678 classed as second homes in the district.

HSSA data for 2016/17 states that there were 14 private rented properties found to have one or more category 1 hazards. In that financial year 15 private rented properties were improved with loans or grants provided by the local authority.

In the second quarter of 2017, median house prices in the constituency stood at £198,950. With median annual salaries at £28,600, the median affordability ratio is 7.0 in the constituency compared to a regional ratio of 5.7.

## Deprivation

The English Indices of Deprivation measure relative levels of deprivation in 32,844 small areas or neighbourhoods, called Lower Super Output Areas (LSOAs), in England. Every such neighbourhood in England is ranked according to its level of deprivation relative to that of other areas (1 being most deprived).

As Figure 2 below shows, the constituency has some of the least deprived neighbourhoods in the country with some ranked above 29,000 but there are large areas (in red) particularly in areas covered by Bucklow-St Martins ward which have a high deprivation ranking.

The Employment Deprivation Domain of IMD is a measure of those involuntarily excluded from the labour market. ONS figures show that the number of VAT/PAYE registered companies in the constituency has increased since 2010 from 3,320 to 4,710 in 2017.

However, monthly Job Seekers Allowance and Universal Credit figures show claimant figures in the constituency increasing. In March 2018 there were 1,790 claimants of these benefits (3.6% of those aged 16 to 64). This is an increase from 3.0% in August 2017.
